

Hokki

V/S

Stool

This funky stool will be available in 2011

- 👉 The Hokki is made from light weight, super tough polypropylene that is 100 % recyclable & UV Stabilized
- 👉 The fluted design of the top makes it easy to pick it up and take it anywhere for group work and discussions
- 👉 The muscles of the abdominal core and those supporting the lumber spine are passively tightened and relaxed as you move on the stool
- 👉 This design absorbs and encourages movement while at the same time improving the attention span of the student while being engaged in a learning process
- 👉 The Hokki achieves it's ergo - dynamic movement through the convex shape of the base.

Colours Available Pumpkin or Navy

A stool designed to improve the musculo-skeletal development of growing children
